[Magniflex Gold Luxury Mattress Bed](#)

May 8th, 2009

Italy's largest mattress manufacturer, Magniflex, has created a uber **luxurious mattress incorporating 22 carat gold** and retailing for **\$24,000** with a matching pillow that retails for \$1000 each.

"Each piece is thermo-regulating, anti-bacterial, odor-proof, and anti-stress, and is customized to fit the comfort levels of the consumer.

By adjusting the five-zoned memory foam construction as needed, **each person can have a rich and restful sleep.**

The mattress also has Magniflex Airyform technology allows air to circulate freely throughout the mattress using "vent chambers" from top to bottom, so the sleeping surface feels cooler."

Magniflex have also created the Platitnum Collection. Each bed will retail for **\$75,000** in queen size, making it not only the most luxurious bed available, but also **one of the most expensive in the world.**
